

Building Art Invention

About

This transdisciplinary platform for research and education pools expertise from the fields of visual art, architecture, urban planning, interaction design, industrial design, experimental physics and materials research. It is dedicated to the development of innovative materials systems at the convergence of art and science.

Through collaborative approaches rooted in actual practice, artists, designers and scientists test and develop methods of project-oriented work and cooperative planning in the context of research projects and research-oriented study projects. Mixed teams of students, teachers and researchers establish research questions and areas of interest, then elaborate them via artistic/scientific processes.

Partners & Collaborations

We believe in the power of collaboration. Working together gets us further faster. We make better decisions because we have more information and understand the perspectives of our partners. We use resources more carefully because we avoid duplicating what others have already created.

Institutional partners

- Forschungsinitiative Zukunft Bau
- Bundesministerium für Umwelt, Naturschutz, Bau und Reaktorsicherheit (BMUB)
- Bundesinstitut für Bau-, Stadt- und Raumforschung (BBSR)
- Bundesministerium für Verkehr, Bau und Stadtentwicklung

- Zentrales Innovationsprogramm Mittelstand (ZIM)
- Bundesministerium für Wirtschaft und Technologie
- Hessisches Ministerium für Wissenschaft und Kunst
- Center for Interdisciplinary Nanostructure Science and Technology (CINSaT)
- DAAD – German Academic Exchange Service
- Max-Planck-Institut für Wissenschaftsgeschichte (MPIWG)
- RKW Rationalisierungs- und Innovationszentrum der Deutschen Wirtschaft e.V.
- Kassel Kultur 2012
- Universitätsgesellschaft Kassel e.V.
- Projektrat der Universität Kassel
- Schering Stiftung
- Dr. Wolfgang Zippel Stiftung
- Karola Plassmann Bahl Stiftung

Collaborations

- Haute Innovation - Material & Technology
- Fabrino Produktionsgesellschaft mbH & Co. KG
- Lothar Beeck Stahlbetonbau GmbH & Co. KG
- Städtische Werke AG
- Sparkassenversicherung Kassel
- Hering Bau GmbH & Co. KG
- SMA Solar Technology AG

Academic Programme

BUILDING ART INVENTION is part of the Department of Visual Arts & Architecture, within the School of Architecture, Urban Planning and Landscape Design at the University of Kassel, Germany.

Advanced courses related to specific media and topics are offered as electives for both undergraduate and graduate students.

Please find further information at www.uni-kassel.de/fb06

Contact & Location

BUILDING ART INVENTION studios and labs are located at the K10 Building, Henschelstraße 2, 34127 Kassel, the administrative office is located at Gottschalkstr. 22, 34109 Kassel.
